

# Business will when your primary standards are out for calibration

**As a lab manager, you expect more from your calibration supplier**

*Your primary standards calibrations should not be a budget buster for your lab. Experience exceptional service, fastest lead times in the industry, and savings of 15-50% over the manufacturer.*

Specializing in physical, dimensional and electronic calibration, ENI Labs has experienced technicians and some of the most advanced equipment available to the calibration industry. We can handle all of your equipment calibration needs, efficiently and cost-effectively.

Together, we can develop a practical, accountable, and cost-effective system for calibration and measurement assurance to meet *your* needs. We can build a service program that addresses your needs and timelines – in-house or on-site. We offer an industry leading turnaround of just three to ten days – and we offer rush service when time is critical and your equipment requires immediate attention.

ENI Labs strives to provide the most accurate calibrations and responsive customer service. How much does this kind of expertise and customer-centric service cost? We are confident that our aggressive standard pricing will bring your company real savings on all your calibration service needs.

## Our Capabilities:

- State-of-the-Art Testing Equipment
- On-site Calibration
- Local Pickup & Delivery Available
- Two convenient Service Plans:
  - Rush – 24-48 Hours
  - Standard – 3-10 Days
- Complete repair service available
- Customer service is our PRIORITY!

CERT #2147.01

ENI offers two levels of service to suit your needs and budget...

**STANDARD**  
3-10 days

**Our Commitment**

As a leader in service in our industry, ENI Labs can perform a range of calibration services for your company including temperature, humidity, electronic, and frequency calibration services. We offer these services either on-site at your facility or we will pick up your equipment for testing in our accredited laboratory.

ENI Labs offers online access to all customer certifications and data. At ENI Labs we strive to offer you not only the best service but the fastest turnaround times possible with prices that cannot be matched.

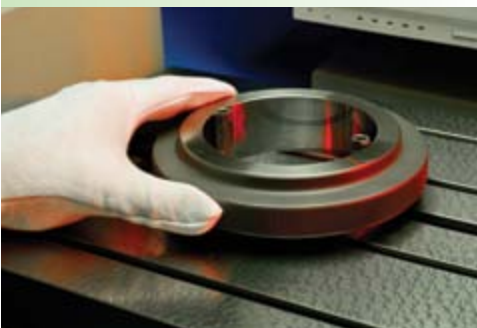

With dedicated and experienced technicians and state-of-the-art calibration equipment, you can rely on ENI Labs to provide your company with the best possible level of service and attention.

**Accreditation**

CERT #2147.01

A2LA's accreditation of a laboratory's compliance with ISO 17025:2005 is the highest level of quality attainable by a testing laboratory. Dedicated to formally recognizing competent testing and calibration laboratories, A2LA is the most stringent accrediting body in the industry.
